WORK EXPERIENCE

75way Technologies Pvt. Ltd. **Mohali, Punjab**

Software developer executive ***(Associate SDE)*** *18 June 2025/ current*

- Developed healthcare, e-commerce, and investment platforms — some from scratch and others in progress. Built complete user flows including sign-up, onboarding, booking, investment, admin, and dashboard systems.
- Features: Worked on features like advanced booking systems, CSV upload/export, sub-admin permission panels, UI animations, and API integrations (including Zoho). Optimized Mongoose queries and React code for better performance, file-upload with AWS S3 bucket.
- Implemented caching for Zoho API, reducing API costs by 90% and improving performance with indexed queries. Built a user-friendly UI with a Custom API Integration Module and debounced search with export functionality.
- **Tech Stack:** React.js, React Router, Tailwind CSS, Bootstrap, Module CSS, TypeScript, Node.js, Express.js, MongoDB, Redis, RESTful APIs, Queue-Worker Architecture, Multer, AWS (S3 bucket), Git, GitHub.

A2DEVELOPERS **Remote (WFH)**

Full Stack Developer *15 Dec 2024 / 15 June 2025*

- Contributed to a generic School-ERP system supporting multiple schools with bulk data import, automated fee management, and notification features for efficient operations.
- Features: Bulk add students via Excel, dynamically assign fees to students and classes, generate fee receipts, send user notifications upon submission, and manage school sessions based on start and end dates.
- Developed dynamic bulk student ID card generation (ZIP), exam report cards and fee receipts (PDF), Android notifications, employee access control, and integrated Razorpay payments — reducing schools' manual work by 90–95%.
- **Tech Stack:** React.js, Node.js, Tailwind CSS, Shadcn UI, Material UI, Express.js, MySQL, React Native, Expo, Expo Push Notification, React Router, Redux, JavaScript, RESTful API, Git, GitHub, Multer, Nodemailer, and Razorpay.

PROJECTS

AI-Assistance Interviewer | GITHUB | LINK

- This project is designed to help individuals prepare for interviews, significantly increasing their chances of selection to 90-95%. As a Full Stack Developer, I created this platform to assist users, including myself, in effectively tackling interviews
- Built an AI interview assistant that customizes mock interviews by role, experience, and question type, and provides detailed feedback on technical skills, confidence, and communication.
- **Tech Stack:-** Nextjs , Typescript, Firebase, Tailwind Css, Generative AI **,** etc

AI-Resume-Reviewer | GITHUB | LINK

- This project helps individuals improve their resume's ATS score, increasing the chances of selection from 90% to 95%, and enhancing agreement with recruiters.
- Developed an AI-powered resume analyzer that generates ATS scores, highlights strengths and weaknesses, suggests improvements, and identifies missing keywords instantly.
- **Tech Stack:-** Reactjs,Nextjs, Nodejs, Javascript, Tailwind Css, Express js, Restful API, Generative-AI

EDUCATION

IPS College of Technology And Management **Gwalior**

Btech/ Bachelors of technology *July 2021 - April 2025*

- 8 GPA, Computer Science And Engineering, etc.

SKILLS & INTERESTS

Skills: Languages: JavaScript, TypeScript, HTML, CSS; **Frameworks & Libraries:** ReactJS, React Native, NextJS, NestJS, NodeJS, ExpressJS, Redux, RTK, Redux Toolkit, Query, Mongoose, OAuth, Multer, React Router DOM, Material UI, Shadcn UI, Tailwind CSS, Bootstrap; **Tools:** Git, GitHub, Docker, Postman, VS Code; **Cloud Platforms:** AWS, Render, Netlify, Vercel, cPanel; **Databases:** MySQL, MongoDB; **Advanced Features:** Responsive Design, code splitting, lazy loading, Authentication (JWT, Cookie), Authorization (JSON Web Token), Generative AI.
